## Disrupting the Social E-Commerce Empowering the Social Values through Blockchain

### OHAS FOR SOCIAL E-COMMERCE

#### Concept

OASIS is a decentralized application that develops the P2P social e-commerce system by utilizing Ethereum Blockchain.

OASIS protocol will allow user, content creator, Organizer and Venue with the private smart wallets, that proceed the transactions of OASIS Ticket, Coupon, STAY, and Streaming.

All these in one digital blockchain.

#### Problem

Today's product sales and distribution system on social e-commerce market is complicated and Complex. Retail dealers and wholesale dealers are in more prominent position than the consumers and producers.

The current social e-commerce system charges excessively high amount of application fee. Scam and fraud are damaging the trust between the fan and artist, travelers and hoteliers, consumers and producers.

#### Solution

1. Payment logs through OHAS token are recorded in the Blockchain smart contracts and no one can manipulate the logs, eliminating the fraud and building up the trust.

2. OHAS token can solve the excessively expensive fee.

3. OHAS provides the opportunity to develop a reputation system that can help evaluate credibility (sellers and buyers).

4. OHAS empowers immediate, secure and smooth cashback transactions through OHAS DAO.

### HOW IT WORKS

Visit the OHAS platform.

In the OHAS platform all the users are assigned with private smart wallets, connected to their IDs.

User and service Provider exchange the flat money to OHAS Token Via Exchange.

Proceed the transactions of OHAS Ticket, Coupon, STAY, and Streaming.

Safe storage, transfer and process of digital asset to everyone in the OHAS ecosystem.
